

Mantis Onion Mesh

- ✓ Cost-effective Solution:
- ✓ Quick Installation
- ✓ High visibility

Onion Barrier Mesh is a cost-effective, UV-resistant solution ideal for short-term applications. This mesh is easy to install and features durable top and bottom straps for quick attachment to support posts, making it a practical choice for temporary setups. The mesh is made from polythene and is available in a vibrant orange color with yellow stripes for high visibility. Heavy-duty ropes at both the top and bottom ensure secure and stable installation. Ideal for creating temporary barriers in various environments, this mesh is perfect for cost-effective, short-term projects.

Features:

- Cost-effective solution:
Designed for budget-conscious, short-term applications, this woven fabric mesh offers an economical alternative without compromising on quality or functionality.
- UV-resistant:
Made with UV-resistant material, it ensures durability and resistance to weathering, even when exposed to prolonged sunlight.
- Quick installation:
Equipped with top and bottom straps for fast and secure attachment to support posts, allowing for easy setup and minimal installation time.
- High visibility:
The bright red mesh features yellow bands for high visibility, ensuring that the barrier is easily noticeable in various environments, enhancing safety.
